

16mm & 20mm CAP ELECTRODES

All cap electrodes are cold formed and may be available in up to three materials and different geometries. Please contact us to find out in which materials they are available.

Z-TRODE CuZr ie FB16Z00
For light to medium gauge coated steels and aluminium.

NITRODE Dispersion Strengthened Copper ie FB16N00
For coated steels and heavy duty applications, giving superior performance and reduced sticking on coated steels.

A-TRODE CuCrZr ie FB16C00
For general uncoated applications.

20mm CAP ELECTRODES
